

2019 KACEP ANNUAL MEETING

Monday, November 18, 2019

Jeptha Creed Distillery

500 Gordon Lane
Shelbyville, KY 40065

CME and Bourbon Experience
(agenda next page)

The Distijl Bourbon Sensory Experience helps participants develop their enjoyment of the world of Kentucky bourbons and whiskies in a way nobody else can – focusing on their personal sensory capabilities, rather than specific brands or bottles.

Through a series of assessments, Distijl guides people to understand their own unique sensory capabilities, sensitivities, and tolerances to inform their bourbon preferences and gain new awareness of how they experience the world.

Tasting? Yes! We will validate these insights through a series of bourbon tasting and aroma sensory evaluations using a variety of bourbons that illustrate the spectrum of flavors and unique bourbon characteristics. As well, participants will gain a new understanding of how to experience the growing number of bourbon choices they may encounter in stores and restaurants.
